PROFESSIONAL SUMMARY

Backend Developer with 3+ years of experience building and maintaining production systems using Python, Django, FastAPI, and Laravel. Experienced in developing REST APIs, real-time systems using WebSockets, and working with Redis for background tasks and caching. Strong understanding of database design and optimization.

Deployed and managed applications on DigitalOcean, supporting thousands of daily users. Hands-on experience with Docker, Kubernetes, and Jenkins through self-driven projects in an AWS lab environment. Comfortable handling features end-to-end, supporting junior developers, and working with cross-functional teams in Agile workflows.

EXPERIENCE

Backend Developer, *Inlancer Technologies*

01/2023 – Present

Rajkot, India

- Architected and maintained backend systems using FastAPI, Redis, RabbitMQ and Celery supporting 3,000+ daily customers with 99.9% uptime and scalable API performance.
- Reduced average API response time by 30% through MySQL query optimization, strategic indexing, and Redis caching of hot data.
- Migrated real-time notifications from polling to WebSockets (websocket), reducing latency by ~40% and lowering server load.
- Built scalable WhatsApp messaging system processing 2,000–3,000 messages/day, achieving 70% delivery and 90% response rates using Redis pub/sub and queues.
- Integrated Razorpay payment gateways, enabling automated transaction processing and reducing manual payment handling by 80%.
- Deployed and managed production applications on DigitalOcean, ensuring 99.9% uptime and high availability.
- Implemented OAuth2 token-based authentication and role-based access control (RBAC).
- Mentored 5+ junior developers through code reviews, pair programming, and best-practice sessions — improving team delivery consistency.
- Collaborated with product managers and frontend teams through Agile sprints, stand-ups, and client demos.

Quality Analyst, *Dhandhania Infotech*

10/2020 – 04/2022

Nagpur, India

- Managed end-to-end QA for US-based property preservation projects, validating large volumes of image and field data against client guidelines.
- Improved data accuracy by ~20%, reducing client rejections by addressing recurring data entry issues across teams.
- Reduced turnaround time by 15% through better cross-team coordination and streamlined handoff processes.

EDUCATION

Bachelor of Engineering – Information Technology,
JD College of Engineering & Management, Nagpur · RTMNU University

2015 – 2018
Nagpur, India

TECHNICAL SKILLS

Backend

- Python
- Django
- Django REST Framework
- FastAPI
- Laravel
- Celery
- RabbitMQ
- Background Processing
- Message Queues
- Rate Limiting

API & Auth

- REST APIs
- WebSockets
- OAuth2
- Token Auth
- JSON
- HTTP/S

DevOps (Basic / Hands-on Learning)

- Docker
- Kubernetes (Minikube)
- Jenkins
- CI/CD Pipelines

Frontend

- HTML5
- CSS3
- JavaScript
- jQuery
- Ajax

Databases & Cache

- MySQL
- Redis (caching, pub/sub, queues)
- SQLite

Cloud & Infra

- DigitalOcean (primary)
- AWS EC2/S3/IAM/VPC (learning)
- Linux/Ubuntu
- Microservices architecture
- Scalable systems
- API Performance

Integrations

- WhatsApp Business API
- Stripe
- Razorpay
- Google Maps API

Tools & Practices

- Git
- GitHub
- Postman
- Agile/Scrum
- Code Review
- Mentoring

PROJECTS

Liliya — WhatsApp Automation Platform, *FastAPI · Celery · Redis · RabbitMQ · WebSockets · MySQL · React*

- Developed and maintain a full-featured platform serving **3,000+ daily clients** with **99.9% uptime**.
WhatsApp automation platform with real-time two-way chat, campaign broadcasting, and rule-based messaging chatbot.
- Processed 2,000–3,000 messages daily using Celery workers backed by Redis and RabbitMQ for reliable async job handling with retry logic.
- Integrated WebSocket-based live chat dashboard in React enabling agents to monitor and respond to conversations in real time, with Redis pub/sub powering instant message delivery across sessions.

SOS Finance — Loan Broker Management Platform,

Laravel · HTML · CSS · JavaScript · jQuery · Ajax · MySQL · REST APIs

- Delivered an end-to-end finance automation platform covering lead ingestion, document management, and workflow status tracking for loan brokers.
- Engineered a configurable lead distribution engine with routing rules that reduced manual broker effort by 40% and improved lead conversion rates.
- Worked on responsive UI using jQuery and Ajax for seamless, page-reload-free interactions across the broker dashboard.

Sonic — E-Commerce & Order Management System,

Django · Laravel · REST API · MySQL · HTML · CSS · JavaScript · jQuery · Ajax

- Delivered a full-stack e-commerce storefront handling hundreds of SKUs with product catalog, shopping cart, and a back-office order management system.
- Integrated QR-code-based order tracking and product authentication flows to prevent counterfeiting and streamline post-sale support.
- REST APIs connected the Django backend to the Laravel-based admin layer, with Ajax-driven UI updates for a smooth operator experience.

MVCO — Industrial Multi-Warehouse Tracking System,

Laravel · HTML · CSS · JavaScript · Ajax · MySQL · Queues

- Led development a multi-warehouse inventory tracking system with live stock visibility across locations utilizing Laravel, Javascript, and MySQL.
- Inventory system used by 20+ employees, reducing manual stock reconciliation efforts and improving operational efficiency.
- Automatic challan approval and reporting dashboards, increasing operational visibility significantly for the client's operations team.
- Used Laravel queues to handle background processing for inventory sync events without blocking the main application thread.

NOTABLE ACHEIVEMENT

Production Deliveries

- Shipped 7+ production web applications across e-commerce, finance, industrial tracking, and recruitment verticals.
- WhatsApp automation work contributed to measurable improvements in client engagement and lead conversion rates.
- Mentored 5+ junior developers — focused on code reviews, clean architecture habits, and delivery consistency.
